About Me

Final-year Computer Science undergraduate at the University of Ruhuna with strong interest in Software Engineering Intern or Backend / Full Stack Software Engineering Intern roles. Hands-on experience in building AI-powered applications, full-stack systems, and backend services using Java, Spring Boot, FastAPI, React, and RESTful APIs. A proactive and motivated undergraduate with strong problem-solving and collaboration skills, seeking an internship to apply technical knowledge in real-world projects and gain industry-level experience.

Projects

CoreHive - Multi-Tenant Cloud Based HR SaaS Platform

University final year project focused on designing and developing a complete Multi tenant HR SaaS platform with customizable modules. Developed the frontend and backend system with a strong focus on Admin Role, implementing business logic, and database integration. Created ER diagrams and UML diagrams to model system architecture and data relationships.

- Java Spring Boot
- MySQL
- React
- TailwindCSS
- JWT Authentication
- Git & Github
- Azure

Pharmacy Management System

Designed and implemented a Pharmacy Management System to manage inventory, billing, and stock records efficiently. The system tracks medicine stock levels, expiry dates, and sales transactions, improving operational accuracy and reducing manual effort.

- C#
- .NET
- Decorator Pattern
- MySQL

Beach Tourism and Activity Management System

Designed a Beach Tourism and Activity Management System to manage tourist activities, bookings, and beach information. The system helps organize services, schedules, and customer data for improved tourism management.

- Java
- JavaFX
- MySQL

Advanced MongoDB: Efficient and Secure Data Management
